------------------	---

Wiki Groups

These groups can be used to define fine grained AccessControl in Foswiki:

Group	Members
BaseGroup	AdminUser WikiGuest UnknownUser ProjectContributor RegistrationAgent
AdminGroup	AdminUser RegistrationAgent RalfErkens
NobodyGroup	

New
Group:

 **Note:** A group topic name must be a WikiWord and **must** end in `. . .Group`. New topics are based on GroupTemplate

IMPORTANT NOTE: Think twice before restricting write access to a web or a topic, because an open system where everybody can contribute is the essence of WikiCulture. Experience shows that unrestricted write access works very well because:

- There is enough peer pressure to post only appropriate content.
- Content does not get lost because topics are under revision control.
- A topic revision can be undone by a member of the AdminGroup if necessary.
